Important information

This Fund has been admitted to mFund, a managed fund settlement service operated by the Australian Securities Exchange (ASX).

This document provides information incorporated by reference in the AMP Capital Corporate Bond Fund ASX mFund investors Product Disclosure Statement (PDS) dated 25 September 2017, and forms part of the PDS. A copy of the PDS and the incorporated information can be obtained free of charge, on request by contacting us on 1800 759 543 or online at www.ampcapital.com.au/pds/why/r.

Before making a decision about investing or reinvesting in the AMP Capital Corporate Bond Fund (the Fund), you should read the PDS and all incorporated information. The information in this document is general information only and does not take into account any investor's personal objectives, financial situation or needs. All investors should obtain financial advice that is tailored to their circumstances.

No company in the AMP Group or any investment manager assumes any liability to investors in connection with investment in the Fund or guarantees the performance of the Responsible Entity's obligations to investors, the performance of the Fund or any particular rate of return. The repayment of capital is not guaranteed. Investments in the Fund are not deposits or liabilities of any company in the AMP Group.

AMP Capital has provided consent to the statements made by or about AMP Capital in this document and has not withdrawn this consent prior to the issue of this document. No company in the AMP Group other than the Responsible Entity is responsible for any statements made in this document.

AMP CAPITAL CORPORATE BOND FUND

Issued	25 September 2017
Incorporated information version	Corporate Bond IBR_R.3
Issuer and responsible entity	AMP Capital Funds Management Limited – referred to in this document as 'the Responsible Entity'.
Investment manager	AMP Capital Investors Limited (ABN 59 001 777 591, AFSL 232497) – referred to in this document as 'AMP Capital', 'we', 'our' or 'us'.
Fund	AMP Capital Corporate Bond Fund – also referred to in this document as 'the Fund' (ARSN 087 391 311, APIR code AMP9024AU).
Unit class	mFund Class R

FUND FEATURES

Overview of the Fund

The Fund aims to deliver to its investors a regular monthly income (which exceeds the income from term deposits and government bonds) whilst seeking to provide capital stability over the medium term.

An important goal for many investors is being provided with a regular and reliable income stream with capital stability. This income may supplement your salary or business earnings and help to build your nest egg or deliver a reliable income to help fund your lifestyle in retirement. The Fund has been designed with the aim of meeting this investor goal. The Fund invests in an actively managed portfolio of corporate bonds, focusing predominantly on investment grade rated corporate bonds in the Australian market, and also has exposure to global bond markets.

Within these markets, the Fund primarily seeks credit securities from companies exhibiting some or all of the following factors:

- capable management and good governance
- transparent financials and sustainable revenues, and
- stable to improving levels of borrowing.

Diversification is achieved mainly through investment in securities across a range of industries such as financials, utilities and telecommunication providers, with the number of securities held at any one time (typically above 100) further adding to the diversified nature of the Fund's portfolio.

Further information about the securities in which the Fund may invest is provided in the 'Fund profile' section of this document.

Our investment approach

Research driven process

Our research driven process has a global focus and combines top down and bottom up analysis with specialist credit portfolio risk management across investment grade and non-investment grade rated securities (see 'Security ratings' in the 'Fund profile' section of this document).

Top down analysis

Top down analysis involves:

- identifying economic themes occurring globally across a range of Australian and global industries
- undertaking a fundamental medium term valuation on the general direction of global credit markets, and
- assessing shorter term transitory influences such as overall corporate earnings outlooks and central bank actions.

Information obtained from this analysis is used to set an overall credit framework for the Fund's portfolio, including determining credit allocation and appropriate industry weightings.

Collaboration with other AMP Capital teams (such as investment strategy and economics, global equities, property and infrastructure) allows us to gauge a range of views on the outlook for global credit markets, from economic and equity perspectives, and for particular issuers and industries.

Based on our view of how a specific industry will perform over the next 12 months, we allocate an outlook for each industry, focusing on factors such as barriers to entry, economies of scale and the buying power of customers and suppliers.

Screening tools and filters, including proprietary quantitative screens and market filters, are used to develop a view on relative values across the different industries.

Bottom up analysis

Bottom up analysis, where we look at individual securities to determine the likelihood that a company will outperform or underperform the industry, involves:

- assessment of the issuer's credit risk, and
- evaluation of individual securities.

In assessing the issuer's credit risk and assigning our own credit rating to the security, we undertake a business and financial risk analysis. Business risk analysis addresses factors such as a company's competitive position and operating efficiency, while financial risk analysis addresses factors such as cash flow and profitability. Our analysis also places particular importance on the company's market position, strategic direction and capital structure.

The evaluation of individual securities involves comparing the merits of a security with other securities issued by that company or its domestic and global peers or between industries. In making these comparisons we take into account factors such as volatility and liquidity, and where the security stands in terms of relative value to its peers.

Credit portfolio risk management

Diversification is used in the portfolio construction process as a key attribute in minimising risk, particularly when investing in lower rated securities. Also, in circumstances such as when markets are less tradeable, we use credit derivatives to increase and decrease our effective credit exposure.

Fund profile

The Fund's investments

The Fund is actively managed, investing primarily in investment grade rated corporate bonds in the Australian market. The Fund also has exposure to global bond markets.

The Fund may also invest in:

- asset backed securities and derivatives, preference shares, convertible bonds, hybrid securities and loans in the Australian market (see 'Types of securities' in this section)
- global credit securities, and derivatives in global credit markets, which may also include a small exposure to emerging markets
- non-investment grade rated securities up to a maximum of 10% of the Fund's investments
- unrated corporate bonds up to a maximum of 15% of the Fund's investments (excluding cash and investments in the AMP Capital Managed Cash Fund)
- cash and cash-like securities such as bank bills
- government, semi-government, government guaranteed or similar securities
- other financial products, such as securities and managed funds offered by us or our associates, and
- privately negotiated bilateral transactions up to a maximum of 5% of the Fund's investments.

Investments in securities (excluding units in funds) offered by us or our associates will not exceed 10% of the Fund's net asset value.

Risk limits (excluding government, semi-government and government guaranteed bonds)

The Fund will be managed to the risk limits outlined below.

CREDIT RATING	MAXIMUM PORTFOLIO ALLOCATION TO SINGLE ISSUER	MAXIMUM PORTFOLIO ALLOCATION TO CREDIT RATING GRADE
AAA	Benchmark + 10%	100%
AA	Benchmark + 10%	100%
A	Benchmark + 5%	90%
BBB	Benchmark + 3%	60%
BB	2%	10%*
B	1%	5%*
CCC and below	0%	0%
Unrated	2%	15%

* The combined maximum portfolio allocation to credit ratings BB and B is 10%.

Security ratings

Investment grade securities are those with a Standard & Poor's credit rating of BBB- or equivalent, or above. Ratings are based on the rating provider having assessed that the securities have adequate financial protection to be able to meet their obligations.

Non-investment grade rated securities are those with a Standard & Poor's credit rating of BB+ or equivalent, or less.

As part of our process we also assign our own credit rating to each security. If a security has not been rated by an external rating agency, it is submitted to our Credit Investment Committee for approval to include in the Fund's portfolio. The committee is made up of department heads and senior investment professionals from across AMP Capital.

Types of securities

Corporate bonds Debt obligations backed by the payment ability and/or assets of the issuing company.

Preference shares Shares that have a higher claim on the assets and earnings of a company than other shares in the same company.

Convertible bonds Bonds that can be converted into a predetermined amount of the company's shares at certain times.

Asset backed securities Securities backed by loans, leases or receivables against assets as well as real estate and mortgage backed securities.

Derivatives Financial instruments (such as options, futures, swaps or credit derivatives) that derive their value from an underlying asset.

Hybrid securities Securities that combine two or more different financial instruments, for example convertible bonds, which have the features of ordinary bonds, but are influenced by the price movements of the equity into which they can be converted.

Access to global credit securities

The Fund can access global credit securities in four ways:

- directly, where the Fund buys a bond in an offshore market and from an offshore issuer⁽¹⁾
- indirectly, where the Fund buys a bond in the Australian market from an offshore company
- through Australian companies, where a large portion of the company's revenue is earned offshore, and
- through Australian companies issuing bonds in offshore markets.

Interest rate management

Duration is the measure of the change in a security's value relative to a change in interest rates. Bonds with higher duration carry more risk and have higher price volatility than bonds with lower duration.

The Fund is able to increase or decrease the duration, depending on whether interest rates are rising or falling, and this may assist in managing risk.

The duration of the Fund is limited to between 0 and 4.5 years of duration. Current duration can be obtained in the Performance Report at www.ampcapital.com.au (go to the Fund page) or by contacting us.

Derivatives

The Fund may use derivatives with the aim of:

- protecting against risks such as unfavourable changes in an investment's price brought about by, for example, changes in interest rates, credit risk, equity prices, currencies or other factors
- enhancing returns by taking advantage of favourable mispricings within a market, as a cost-effective alternative to purchasing physical assets, and
- implementing the Fund's investment objectives.

The Fund may 'short' derivatives, that is, it may hold credit default swaps where the underlying asset or assets are not held by the Fund. It may also hold other types of derivatives where the underlying asset or assets are not held by the Fund.

We impose restrictions on the use of derivatives within the Fund and monitor the implementation of these restrictions in accordance with the AMP Capital Derivatives Risk Statement, which can be obtained online at www.ampcapital.com.au, or free of charge by contacting us.

Hedging

Exposure to global credit securities will principally be hedged back to Australian dollars.

The Fund uses an active hedging strategy to manage the effects of market interest rates and minimise currency fluctuations on capital within the Fund.

Currency exposures and hedging are co-ordinated and overseen by the Exposure Management team with the team performing daily monitoring and position adjustments to reflect any changes to underlying currency exposures. Currency hedges are monitored at both the portfolio and individual currency level.

¹ The amount of exposure to direct global credit securities can change significantly, depending on market opportunities. Current exposure can be obtained in the Performance Report at www.ampcapital.com.au (go to the Fund page) or by contacting us.

Gearing

It is not our intention to gear the Fund through the use of borrowing or derivatives. However, underlying funds and securities in which the Fund invests may be geared through the use of derivatives or borrowing. The Fund will be managed such that the risks characteristics of the Fund are consistent with the investment objectives of the Fund.

Repurchase agreements

The Fund may enter into repurchase agreements, in which the Fund sells bonds and agrees to purchase them back at a later date. This repurchase liability may be material in relation to the overall size of the Fund. The Fund generates net income through the running of the repurchase program.

Environmental, social and governance (ESG) considerations

Over the next 12 months, AMP Capital will be changing its approach to how labour standards, environmental, social, ethical and governance (ESG) considerations are taken into account. To date, decisions made by us about whether to buy, hold or sell investments are based primarily on financial and economic factors, and ESG issues may be taken into account by us only where we believe these factors may have a financially material impact on the value and performance (risk and/or return) of the investment.

Going forward, AMP Capital will take account of labour standards, environmental, social, ethical or governance considerations in the selection, retention or realisation of investments across all asset classes (other than cash, sovereign bonds, derivatives and exchange traded funds), in the manner set out in the 'Other important information' section of this document. However, where AMP Capital or an investment manager invests in a pooled vehicle or fund managed by an external investment manager and AMP Capital is unable to influence exclusive control over the investable universe of such a vehicle or fund, the negative screening outlined is not applied and such an investment will be subject to whatever ESG policy is adopted by the investment manager of that vehicle or fund.

The negative screening will also not apply to cash, sovereign bonds, derivatives and exchange traded funds.

RISKS OF INVESTING

All investing involves risk

Generally, the higher the expected return, the higher the risk.

Whilst the Fund is managed with the aim of providing competitive investment returns against the Fund's performance benchmark and protecting against risk, you should be aware that the Fund is subject to investment risks, which could include delays in repayment, the non-payment of distributions and loss of income and capital invested.

Investment risks can affect your financial circumstances in a number of ways, including:

- your investment in the Fund may not keep pace with inflation, which would reduce the future purchasing power of your money
- the stated aims and objectives of the Fund may not be met
- the amount of any distribution you receive from the Fund may vary or be irregular, which could have an adverse impact if you depend on regular and consistent distributions to meet your financial commitments, and
- your investment in the Fund may decrease in value, which means you may get back less than you invested.

As the risks noted in this section do not take into account your personal circumstances, you should also consider the information provided under 'Making an investment decision' in this section before making a decision about investing or reinvesting in the Fund.

Risks specific to the Fund

Credit

The value of the Fund's investments may be sensitive to changes in market perceptions of credit quality, both of individual issuers and of the credit markets in general. The Fund invests in credit related securities and takes credit risk in order to achieve its investment objectives. However, the value of such securities, and therefore the Fund's unit price, may be impacted by changes in the market's perception of credit quality.

Interest rates

Cash and fixed income investments will be impacted by interest rate movements. While capital gains may be earned from fixed income investments in a falling interest rate environment, capital losses can occur in a rising interest rate environment. The risk of capital gain or loss tends to increase as the term to maturity of the investment increases.

Liquidity

Liquidity refers to the ease with which an asset can be traded (bought and sold). An asset subject to liquidity risk may be more difficult to buy or sell and it may take longer for the full value to be realised.

Where the Fund has exposure to investments which are generally considered to be illiquid, it may be subject to liquidity risk.

We manage the Fund's portfolio with the aim of ensuring that exposure to illiquid assets is no greater than 20%. However, in circumstances where the Fund's portfolio consists of less than 80% in value of liquid assets, we may not be able to meet withdrawal requests within the periods specified under the 'Payment times' section of this document, and may suspend processing all withdrawal requests for such period as we determine.

In addition, we will not meet withdrawal requests if the Fund ceases to be 'liquid' for the purposes of the Corporations Act. However, although we are not obliged to, we may offer investors the opportunity to make withdrawals where the Fund is not 'liquid' during this period, as set out under the 'Processing withdrawal requests' section of this document.

Counterparty or default risk

Issuers or entities upon which the Fund's investments depend may default on their obligations, for example, by failing to make a payment due on a security or by failing to return principal. Such parties can include the issuers of securities held by the Fund (or those referenced in credit derivative transactions) and may include sovereigns, supranational entities, government and states, as well as corporations.

Counterparties to the Fund may default on a contractual commitment to the Fund. Counterparties may include over-the-counter derivatives counterparties, brokers (including clearing brokers or exchange traded instruments), repurchase agreement counterparties, foreign exchange counterparties, as well as the Fund's custodian. Default on the part of an issuer or counterparty could result in a financial loss to the Fund. Investing through the mFund settlement service brings some risk that the ASX may suspend or revoke the admission of the Fund to the mFund settlement service, that the ASX's systems could fail, or there could be errors in connection with the system.

Derivatives

There are risks of losses to the Fund through the use of derivatives, and where derivatives are used by underlying funds in which the Fund invests, including:

- the value of a derivative may not move in line with the value of the underlying asset
- a derivative position cannot be reversed
- losses may be magnified, and
- the party on the other side of a derivative contract defaults on financial or contractual obligations.

Gearing

Gearing (borrowing against the Fund's assets) has the effect of magnifying the Fund's returns, both positive and negative, which means that the risk of loss of capital may be greater than if gearing did not take place. Additionally, increases in interest rates may affect the cost of the Fund's borrowings and so reduce the Fund's returns.

International investments

Changes in the state of the world economies may affect the value of your investment in the Fund.

- **Currency exchange rates** – where the Fund's investments are located overseas, the relative strength or weakness of the Australian dollar against other currencies may influence the value of, or income from, an investment.
- **Currency hedging** – where international investments are primarily hedged back to Australian dollars, the Fund could still incur losses related to hedging or currency exchange rates. Such losses may affect the Fund's taxable income and its subsequent ability to pay distributions. Risks such as illiquidity or default by the other party to the hedging transaction may also apply.
- **Less protection under laws outside of Australia** – the laws under which assets located outside of Australia operate may not provide equivalent protection to that of Australian laws, which may mean that the Fund is unable to recover the full or part value of an offshore investment.
- **Emerging markets** – securities markets in emerging markets are smaller and have been more volatile than the major securities markets in more developed countries. This is often a reflection of a less developed country's greater political instability or uncertainty, exchange rate uncertainty, lower market transparency or uncertain economic growth. Clearance and settlement procedures in an emerging country's securities market may be less developed which could lead to delays in settling trades and registering transfers of securities.
- **Operational risk** – investing across multiple markets and currencies magnifies risks associated with international investments.

Investment management

There is a risk that the investment manager will not perform to expectation or factors such as changes to the investment team or a change of investment manager may affect the Fund's performance.

Listed hybrid securities

As listed hybrid securities are a combination of debt and equity, they have the risk characteristics of fixed income and share market investments, as well as those associated with derivatives (if applicable). In addition, there is the risk that they may not be able to be exchanged readily for cash or an equivalent asset value.

Share market investments

Share market investments have historically produced higher returns than cash or fixed interest investments over the long term. However, the risk of capital loss exists, especially over the shorter term. You should be aware that past share market investment performance is not an indication of future performance.

Specific risks may include a slowdown in economic growth, individual companies reporting disappointing profits and dividends, and management changes. Where a fund is invested in listed securities, the value of these securities may decrease as a result of these and other events.

Other risks

When you invest in a managed investment scheme, the risks are also higher than investing in a term deposit or government bond.

Other risks of investing may apply and you should seek appropriate advice before investing.

Making an investment decision

As the risks noted in this document do not take into account your personal circumstances, you should consider the following before making a decision about investing or reinvesting in the Fund:

- **Obtain professional advice** to determine if the Fund suits your investment objectives, financial situation and particular needs.
- **Read** a current AMP Capital Corporate Bond Fund PDS, available on our website at www.ampcapital.com.au/pds/why/r.
- **Consider** the suggested minimum investment timeframe for the Fund, as set out in the Fund's PDS.
- **Regularly review** your investments in light of your investment objectives, financial situation and particular needs.

FEES AND COSTS

Fee summary

This document shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole.

Taxes are set out in another part of this document. You should read all the information about fees and costs because it is important to understand their impact on your investment. Unless otherwise specified, all dollar amounts are Australian dollars.

Table 1

AMP Capital Corporate Bond Fund

TYPE OF FEE OR COST	AMOUNT	HOW AND WHEN PAID
Fees when your money moves in or out of the managed investment product		
Establishment fee The fee to open your investment.	Nil	Not applicable
Contribution fee The fee on each amount contributed to your investment.	Nil	Not applicable
Withdrawal fee The fee on each amount you take out of your investment.	Nil	Not applicable
Exit fee The fee to close your investment.	Nil	Not applicable
Management costs¹		
The fees and costs for managing your investment.	0.61% pa of the Fund's net assets	Management costs are comprised of: <ul style="list-style-type: none"> • a management fee² – calculated daily and paid monthly out of the Fund's assets and reflected in the unit price. • indirect costs³ – paid out of the Fund's assets or interposed vehicle's⁴ assets once the cost is incurred and reflected in the unit price. Calculated on the basis of the Responsible Entity's reasonable estimate or knowledge of such costs.
Service fees		
Switching fee The fee for changing investment options.	Nil	Not applicable

1. This amount comprises the management fee and estimated indirect costs. The sum of these figures may differ to the total management costs, due to rounding. For more information about management costs, see 'Management costs' under the heading 'Additional explanation of fees and costs'.
2. The management fee may be negotiated with investors who are wholesale clients for the purposes of the Corporations Act. See 'Differential fees' under the heading 'Additional explanation of fees and costs'.
3. For more information on the meaning and calculation of indirect costs, see 'Indirect costs' under the heading 'Additional explanation of fees and costs'.
4. For more information on the meaning of interposed vehicles, see 'Indirect costs' under the heading 'Additional explanation of fees and costs'.

Important

Advice fees agreed between you and your financial adviser and other service fees may apply to your investment in the Fund. Advice fees may be in the form of an investment advice fee and/or an ongoing advice fee. Please refer to 'Payments to your financial adviser' in this section for information about the advice fees that may be payable. Broker fees may also be payable to your broker for accessing the Fund through mFund. Please refer to 'mFund costs' in this section for fees that may be payable.

Additional explanation of fees and costs

Management costs

Management costs are expressed as a percentage of the Fund's net assets, rounded to two decimal places. Management costs are made up of a management fee, an estimated performance fee (if applicable) and estimated indirect costs. Any management fees, performance fees or indirect costs charged by interposed vehicles are included in the management costs in Table 1; they are not an additional cost to you.

Management costs components

The management costs shown in Table 1 comprise the following components. The sum of these figures may differ to the total management costs, due to rounding. All figures in the table below are expressed as a percentage of the net assets of the Fund.

MANAGEMENT FEE (% PA)	INDIRECT COSTS (% PA)	
	Recoverable expenses	Estimated other indirect costs
0.60%	0.01%	0.00%

Management fee

The management fee is charged by the Responsible Entity for managing and operating the Fund. The management fee of 0.60% is charged on the value of the gross assets of the Fund. When calculating the value of the gross assets of the Fund for this purpose, we may value any units held by the Fund in underlying funds by reference to the gross assets of the underlying funds (that is, disregarding the value of any borrowings, other liabilities or provisions in those underlying funds) rather than the net asset value. For the purposes of the management costs calculation in Table 1, the management fee has been expressed as a percentage of the Fund's net assets.

Indirect costs

Indirect costs are generally any amount the Responsible Entity knows or estimates will reduce the Fund's returns, that are paid from the Fund's assets or the assets of interposed vehicles.

Generally, an interposed vehicle is a body, trust or partnership in which the Fund's assets are invested. It includes, for example, an underlying fund.

The amount of indirect costs include, but are not limited to:

- recoverable expenses of the Fund
- management costs of an interposed vehicle (including recoverable expenses, performance-related fees and any other indirect costs of underlying managers or interposed vehicles in which the Fund invests), and
- a reasonable estimate of the costs of investing in over-the-counter (OTC) derivatives (either at the Fund level or in interposed vehicles), which may be used by the Fund to gain economic exposure to assets.

The amount of indirect costs shown in the 'Management costs component' table is based on the Responsible Entity's knowledge of, or where required, reasonable estimate of, such costs. Indirect costs are generally calculated on the basis of indirect costs paid by the Fund in the Fund's previous financial year. As such, the actual indirect costs may differ from the amount shown in the 'Management costs components' table. Indirect costs are deducted from the returns on your investment or from the Fund's assets as a whole. They are reflected in the unit price and are not an additional cost to you. Estimated indirect costs are included in the management costs in Table 1.

Recoverable expenses

The Fund's constitution entitles the Responsible Entity to be reimbursed from the Fund for any expenses incurred in relation to the proper performance of its duties.

The Responsible Entity may also recover other expenses relating to the operation of the Fund. These expenses include but are not limited to audit and legal fees, tax and accounting services, custody, administration and registry services, regulatory compliance, the cost of preparing disclosure documents and costs associated with a securities lending program (if applicable). Internal expenses incurred in connection with these matters may also be recovered from the Fund. Recoverable expenses are included in the management costs in Table 1.

Updated fees and costs information

The management costs components are based on the Responsible Entity's actual knowledge, or reasonable estimate, of the particular fee or cost. Estimates may be based on a number of factors, including (where relevant), previous financial year information, information provided by third parties or as a result of making reasonable enquiries, and typical costs of the relevant investment. As such, the actual fees and costs may differ and are subject to change from time to time. Updated information that is not materially adverse to investors will be updated online at www.ampcapital.com.au, or you may obtain a paper copy or an electronic copy of any updated information from us, free of charge, on request. However, if a change is considered materially adverse to investors, the Responsible Entity will issue a replacement PDS and/or updated incorporated information, both of which will be available online. You can also obtain a copy of these documents free of charge, by contacting us.

Transactional and operational costs

The Fund incurs transactional and operational costs when dealing with the assets of the Fund. Transactional and operational costs may include transactional brokerage, clearing costs, stamp duty, the buy and sell spreads of any underlying fund and the costs of (or transactional and operational costs associated with) derivatives. These costs will differ according to the type of assets in the Fund, or the purpose for which any derivatives are acquired, and will be paid out of the Fund's assets.

We estimate the Fund's transactional and operational costs to be approximately 0.14% of the net assets of the Fund.

Buy and sell spreads

Transactional and operational costs associated with dealing with the Fund's assets may be recovered by the Fund from investors, in addition to the fees and costs noted in Table 1.

Investments and withdrawals in the Fund may incur buy and sell spreads, which are designed to ensure, as far as practicable, that any transactional and operational costs incurred as a result of an investor entering or leaving the Fund are borne by that investor, and not other investors.

Buy and sell spreads are calculated based on the actual or estimated costs the Fund may incur when buying or selling assets. They will be influenced by our experience of the costs involved in trading these assets or the costs that the Fund has actually paid, and will be reviewed whenever necessary to ensure they remain appropriate.

When you enter or leave the Fund, any buy or sell spread applicable at that time is a cost to you, additional to the fees and costs noted in Table 1, and is reflected in the unit price. The buy and sell spreads are retained within the Fund, as assets of the Fund; they are not fees paid to the Responsible Entity, AMP Capital or any investment manager.

The buy spread is taken out of application amounts. The sell spread is taken out of withdrawal amounts. As at the date of this document, a buy spread of 0.20% and a sell spread of 0.20% apply to the Fund. Based on the buy and sell spreads noted above, an investment of \$50,000 would incur a buy spread of \$100, and a withdrawal of \$50,000 would incur a sell spread of \$100. This is an example only; it is not an estimate or forecast. The actual buy and/or sell spreads may be higher or lower.

Current buy and sell spreads can be obtained online at www.ampcapital.com.au/spreads or by contacting us.

If investments and withdrawals in the Fund incur buy and sell spreads, we estimate that a buy spread of 0.20% and a sell spread of 0.20% will recover all of the Fund's transactional and operational costs incurred due to investor activity. However, the balance of the Fund's transactional and operational costs will be borne by the Fund from the Fund's assets without any recovery from individual investors and reflected in the Fund's unit prices.

The following table shows a breakdown of the total estimated transactional and operational costs and how these are borne by investors.

Total estimated transactional and operational costs	0.14%
Estimated transactional and operational costs offset by buy/sell spreads	0.09%
Estimated transactional and operational costs borne by the Fund	0.06%

Other costs

mFund costs

Fees may be payable to your broker for accessing the Fund through mFund. These may be charged when you acquire or redeem units in the Fund. You should refer to your broker's Financial Services Guide.

Borrowing costs

Borrowing costs (or gearing costs) are the costs associated with borrowing money or securities (such as interest, establishment fees, government charges and stock borrowing fees). Borrowing costs are paid out of the Fund's assets or the underlying fund's assets (as the case may be) and reflected in the unit price.

We estimate these borrowing costs to be 0.00% of the Fund's net assets. These costs will be paid out of the Fund's assets and are additional to the fees and costs noted in Table 1 above.

Costs related to certain specific assets or activities to produce income

The Fund may also incur costs (related to certain specific assets or activities to produce income) that an investor would incur if they invested directly in a similar portfolio of assets. These costs will be paid out of the Fund's assets and are additional to the fees and costs noted in Table 1 noted above.

Liabilities properly incurred

The Fund's constitution entitles the Responsible Entity to be indemnified from the Fund for any liability properly incurred.

Maximum fees

The maximum fees that can be charged under the Fund's constitution (exclusive of GST) are:

- **Contribution fee** – 5% of the application amount. Currently, no contribution fee is charged.
- **Withdrawal fee** – 5% of the withdrawal amount. Currently, no withdrawal fee is charged.
- **Management fee** – 3% per annum of the value of the assets of the Fund. The current management fee charged is 0.60% per annum.

Under the Fund's constitution, the Responsible Entity is entitled to be paid an additional amount on the above fees, on account of GST, calculated in accordance with the Fund's constitution.

Goods and Services Tax

Unless otherwise stated, the fees and other costs shown in this section are inclusive of GST and any applicable stamp duty, less reduced input tax credits or other input tax credits claimable. For information about the tax implications of investing in the Fund, refer to the 'Taxation' section of this document.

Differential fees

A rebate of part of the management fee or a lower management fee may be negotiated with investors who are wholesale clients for the purposes of the Corporations Act or with AMP Group staff. Further information can be obtained by contacting us.

Alternative forms of remuneration

AMP Capital and the Responsible Entity may provide alternative forms of remuneration, such as professional development, sponsorship and entertainment for financial advisers, dealer groups and master trust or investor directed portfolio service (IDPS) operators, where the law permits. Where such benefits are provided, they are payable by us or the Responsible Entity and are not an additional cost to you. AMP Capital and the Responsible Entity maintain a register to record any material forms of alternative remuneration AMP Capital or the Responsible Entity may pay or receive. We will provide you with a copy of our register, free of charge, on request.

Payments to your financial adviser

Advice fees

You may agree with your financial adviser that advice fees will be paid for services your financial adviser provides to you.

These advice fees are additional to the fees shown in Table 1, and are paid to your financial adviser, not to us or the Responsible Entity.

Other payments and benefits

Your financial adviser may receive payments and/or other benefits from the dealer group or organisation under which they operate. These payments and benefits are not a cost to the Fund.

Other payments

Payments such as online brokerage payments may be made to other parties in relation to your investment in the Fund.

These costs are paid out of the management costs; they are not an additional cost to you.

TAXATION

Taxation treatment of your investment

It is important that you seek professional taxation advice before you invest or deal with your investment, as the taxation system is complex, and the taxation treatment of your investment will be specific to your circumstances and to the nature of your investment.

These comments are intended for investors who hold their investment on capital account for income tax purposes based on our interpretation of Australian taxation laws and administrative practices at the date of publication of this document.

Generally, you will be liable to pay tax on your share of the taxable income of the Fund whether or not distributions are reinvested. You may be entitled to tax offsets, which reduce the tax payable by you, and concessional rates of tax may apply to certain forms of income such as capital gains. Australian resident individuals are liable to pay tax at their marginal rates on their share of the taxable income of the Fund. Generally, tax is not paid on behalf of investors. If you are not an Australian resident for income tax purposes, withholding tax will be deducted from your share of the taxable income of the Fund at prescribed rates dependent on the components of the Fund's taxable income.

Please note that at the time of your initial or additional investment there may be unrealised capital gains or accrued income in the Fund. If these amounts are subsequently realised, they may be paid to you as part of a distribution from the Fund. In addition, there may be realised but undistributed capital gains or income in the Fund. These amounts may be paid to you as part of the next distribution from the Fund.

You may also be liable to pay capital gains tax on any capital gains in respect of your investment, such as from disposing of your investment. You may instead realise a capital loss in respect of your investment, which may be used to reduce capital gains in the same or later years. The cost base of your investment, which is relevant when calculating any such capital gains or losses, may change over the duration of holding your investment. For example, certain non-assessable distributions have the effect of reducing your cost base.

If the Fund holds investments which are located outside of Australia, the Fund's income may include non-Australian sourced income. You may be entitled to foreign income tax offsets for foreign tax already paid.

Any losses generated by the Fund cannot be passed onto investors. However, where specific requirements are satisfied, the Fund should be eligible to offset losses to reduce later year income or capital gains.

Taxation laws and administrative practices change from time to time. Australia is in the process of taxation reform. These reforms may impact the taxation of the Fund and you as an investor. It is an investor's responsibility to consider and monitor the impact of any taxation reforms impacting their investment, both now and into the future.

Providing a Tax File Number (TFN)

You do not have to provide a TFN, exemption code or Australian Business Number (ABN) when you complete an application to invest or reinvest in the Fund. However, if you do not provide any of these, the Responsible Entity may be required to deduct tax from most distributions, including where those distributions are reinvested, at the highest marginal tax rate, plus any applicable levies.

DISTRIBUTIONS

Unit prices will normally fall after the end of each distribution period. Consequently, if you invest just before the end of a distribution period, some of your capital may be returned to you as income in the form of a distribution.

Any distributions you receive may affect the social security benefits to which you are or may be entitled, and you should consider discussing this with your financial adviser, Centrelink or the Department of Veterans' Affairs before investing.

Payment of distributions

You can choose to have distributions:

- paid directly into your current nominated account, or
- reinvested in the Fund.

If no selection is made, distributions will be paid to your nominated account.

Distributions paid are based on the income earned by the Fund and the number of units you hold at the end of the distribution period. For example, if you held 50,000 units in the Fund, and the Fund paid a distribution of \$0.02 per unit for the distribution period, you would receive \$1,000 (that is, 50,000 units x \$0.02 per unit). Please note this is an example only and not a forecast, the distribution rate will vary for each distribution.

If we do not have valid bank account details on file, your payment will be withheld until you supply valid bank account details.

Reinvestment

Under the Fund's constitution, the issue price for reinvested distributions is determined by the net asset value (adjusted by any distribution payable), any transaction costs and the number of units on issue in the unit class as at the last day of the distribution period. However, no buy spread is applied to reinvested distributions (see 'Buy and sell spreads' in the 'Fees and other costs' section of this document).

INVESTING IN THE FUND

How to invest

mFund settlement service

The Fund has been admitted to mFund, a managed fund settlement service operated by the Australian Stock Exchange (ASX). The service uses CHESS, the ASX electronic settlement system for you to apply for or redeem units in the Fund via your broker (broker-sponsored units). The mFund settlement service does not facilitate on-market buying and selling between investors. The mFund units settled through the mFund settlement service are issued and redeemed by us.

Initial and additional investments

You will need to apply via your broker using the ASX settlement system for broker-sponsored units when you apply for an initial investment in the Fund, make an additional investment, or set up a regular investment plan. Your holding of the broker-sponsored units will be linked to your individual HIN that is used to hold your other investments transacted through the ASX. If you do not currently have a HIN, you will be issued with one.

You can make additional investments of at least \$2,000 at any time.

Regular investment plan

The regular investment plan enables you to invest regular monthly amounts by direct debit (see below). A minimum investment amount of \$500 per month applies. Monies debited from your account to pay for your regular investment plan takes three Business Days to clear. For this reason, units cannot be issued until three days after your bank account has been debited. If the debit is unsuccessful, no units will be issued.

Initial, additional and regular investments are made on the basis of the PDS current at the time of the investment.

Terms and conditions of investing

The offer to invest in the Fund is subject to the terms and conditions described in the Fund's current PDS and incorporated information, and as set out in the Fund's constitution (see the 'Other important information' section of this document). The Responsible Entity reserves the right to change the terms and conditions (see below) and to refuse or reject an application.

We can only accept applications signed and submitted from within Australia. We cannot accept cash.

Changes to the information in the PDS

Before making an investment decision, it is important to read a current PDS, as information provided in a PDS and in information incorporated by reference in the PDS, may change from time to time. If changes are not materially adverse to investors, the relevant information will be updated online at www.ampcapital.com.au. However, if a change is considered materially adverse to investors, the Responsible Entity will issue a replacement PDS and/or updated incorporated information, both of which will be available online. You can also obtain a copy of these documents free of charge, by contacting us.

Processing applications

If we receive your application form:

- by 10.30 am on a Business Day, your investment will earn income (using the close of business issue price for that day), or
- after 10.30 am on a Business Day, your investment will earn income (using the close of business unit price for the next Business Day).

A Business Day for us is any day other than Saturday, Sunday or a bank or public holiday in Sydney, NSW.

Issue price

The issue price is determined under the Fund's constitution by reference to the net asset value and transaction costs pertaining to the relevant class of units, and the number of units on issue in that unit class.

Investments made through this class relate to mFund units. As with the other classes of units in the Fund, mFund unit prices are based on the net asset value of the Fund. This is not the same as for a listed fund, where the listed market price determines the value of the units.

The market value and net asset value of the Fund are normally determined at least each Business Day, using the market prices and unit prices of the assets in which the Fund is invested.

The Responsible Entity may suspend unit pricing and exercise certain discretions in determining the unit price (see 'Unit Pricing Discretions Policy' in the 'Other important information' section of this document).

Interest earned on your application amounts

Your application amounts will be held in an applications account until units in the Fund are issued to you. Any interest earned on those amounts whilst they are held in the account will be credited to the Fund.

Nominated representative

You may nominate a representative to operate your investment in the Fund on your behalf. Your nominated representative will be able to exercise the same powers as you under the Fund's constitution, including transacting on your investment account.

Conditions

By nominating a representative, you agree to certain conditions, including indemnifying the Responsible Entity against any liabilities arising out of the nomination of your representative. You will be provided with the full terms and conditions when you nominate your representative.

Please contact us if you require further information.

ACCESSING YOUR MONEY

Requesting a withdrawal

To redeem from the Fund, you can apply to withdraw your units via your broker by placing a sell order with your broker (or financial planner if applicable).

Minimum withdrawal amount and account balance

A minimum withdrawal amount of \$2,000 applies, and a balance of \$10,000 is generally required to keep your investment open. If your account balance falls below this level, the Responsible Entity may redeem your investment and pay the proceeds to you. The Responsible Entity reserves the right, however, to accept lower account balances.

Processing withdrawal requests

If our Sydney office receives a withdrawal request before 11.15am on a Business Day, your withdrawal will be processed using the withdrawal price for that day. If received and accepted after 11.15am, it will be processed using the withdrawal price for the next day. If it is a non-Business Day in Sydney, your withdrawal will be processed using the next available withdrawal price.

The proceeds of your withdrawal request will usually be available within five (5) Business Days (see 'Payment times' in this section).

In circumstances where the Fund's portfolio consists of less than 80% in value of liquid assets, for example because of an unexpected fall in the value of those liquid assets against the value of the illiquid assets in the Fund's portfolio, we may not be able to meet withdrawal requests until the Fund's exposure to illiquid assets falls to 20% or less of its portfolio. We may, at our discretion, offer investors the opportunity to make withdrawals during this period. At such times, we will notify investors of the offer, providing details about:

- the period during which the offer will remain open, and
- which assets will be used to satisfy withdrawal requests.

Total withdrawals

Where the total withdrawals exceed 5% of the net assets of the Fund on any one day, the Responsible Entity may determine that part of the withdrawal amount payable consists of income.

Withdrawal price

The withdrawal price is determined under the Fund's constitution by reference to the net asset value and transaction costs pertaining to the relevant class of units, and the number of units on issue in that unit class.

The market value and net asset value of the Fund are normally determined at least each business day, using the market prices and unit prices of the assets in which the Fund is invested. Investments made through this class relate to mFund units. As with the other classes of units in the Fund, mFund unit prices are based on the net asset value of the Fund. This is not the same as for a listed fund, where the listed market price determines the value of the units.

The Responsible Entity may suspend unit pricing and exercise certain discretions in determining the unit price (see 'Unit Pricing Discretions Policy' in the 'Other important information' section of this document).

Payment times

Although the proceeds of your withdrawal request will usually be available within five (5) Business Days of receipt, you should be aware that:

- payment and processing of withdrawal requests is dependent on the Fund's cash position, and
- the Fund's constitution allows up to 30 days, or longer in some circumstances, to process withdrawal requests. These circumstances include, but are not limited to:
 - where the Responsible Entity is unable to realise sufficient assets due to circumstances beyond its control, such as restricted or suspended trading in the market for an asset, or
 - if the Responsible Entity does not consider it is in the best interests of investors to realise sufficient assets to satisfy a withdrawal request.

Transfer of units

Please contact us for all transfer requests.

OTHER IMPORTANT INFORMATION

The Fund's constitution

The Fund's constitution provides the framework for the operation of the Fund and with the Fund's PDS, the Corporations Act and other relevant laws, sets out the relationship between the Responsible Entity and unitholders. We will send you a copy of the Fund's constitution free of charge, on request.

Overview of the Fund's constitution

The Fund may have a number of classes of units. Under the Fund's constitution, the different unit classes may have different management costs, expenses and distributions, but otherwise all classes of units have similar rights. Some of the provisions of the Fund's constitution are set out in the Fund's PDS and in this document. Further provisions relate to:

- the rights and liabilities of unitholders
- the times when processing of withdrawal requests can be extended, such as if the Fund is illiquid or it is not in the best interests of unitholders
- where taxes or other amounts can be deducted from payments to unitholders
- where transfers and applications may be refused
- the liability of the Responsible Entity to unitholders in relation to the Fund, which is limited to any liability imposed by the Corporations Act, so long as the Responsible Entity acts in good faith and without gross negligence
- the powers, rights and liabilities of the Responsible Entity, including its power to invest the assets of the Fund, to deal with itself and its associates, to be paid fees and to be reimbursed or indemnified out of the assets of the Fund
- the right of the Responsible Entity to be reimbursed by a unitholder or former unitholder for tax or expenses it incurs as a result of the unitholder's request, action or inaction, or to redeem units to satisfy amounts due to the Responsible Entity from a unitholder
- changing the Fund's constitution, including in some cases without unitholder approval, such as to meet regulatory changes
- the ability of the Responsible Entity to terminate the Fund at any time
- when the Responsible Entity can terminate the Fund or retire, and what happens if this occurs, and
- voting rights.

Although the Fund's constitution limits a unitholder's liability to the value of their units, the courts have yet to determine the effectiveness of provisions like this.

Compliance plan

The Responsible Entity has a compliance plan for the Fund, which sets out the measures that will apply in operating the Fund to ensure compliance with the Corporations Act and the Fund's constitution. The compliance plan is lodged with the Australian Securities and Investments Commission (ASIC) and is audited by independent auditors annually to determine compliance with it.

A compliance committee monitors the operation of the Fund and overall compliance with the compliance plan. The majority of the members of the compliance committee must be, and are, independent of both AMP Capital and the Responsible Entity. The compliance committee has the obligation to monitor compliance with the compliance plan and to report certain breaches of the Corporations Act and the compliance plan to ASIC.

Related party transactions

Any transaction between AMP Capital or the Responsible Entity and any of their respective related parties must comply with related party protocols and AMP Capital policies and procedures. For these purposes, a related party includes certain entities and individuals that have a close relationship with AMP Capital or the Responsible Entity. Related parties of the Responsible Entity include the Responsible Entity itself, entities that the Responsible Entity controls, funds operated or managed by the Responsible Entity and agents of the Responsible Entity.

As at the date of this document, the relevant policies and procedures that apply to related party transactions of AMP Capital or the Responsible Entity are contained in the AMP Conflicts of Interest Policy. Under this Policy, the parties must transact on terms that would be reasonable if they were dealing at arm's length, relevant legislative requirements must be satisfied and the interests of investors must be protected. The Policy will be reviewed on a regular basis and may change from time to time.

Under the Fund's constitution, the Responsible Entity may:

- deal with itself, an associate, investor or any other person
- be interested in and receive a benefit under any contract or transaction with itself, an associate, investor or any other person, or
- act in the same or similar capacity in relation to any other fund.

The Fund's constitution also provides that amounts may be paid to related parties for services provided to AMP Capital in connection with the Fund and for expenses. These payments are on arm's length terms.

Continuous disclosure obligations

Where the Fund has more than 100 unitholders it is subject to regular reporting and disclosure obligations under the Corporations Act. Copies of documents lodged with ASIC in relation to the Fund may be obtained from, or inspected at, an ASIC office or can be obtained free of charge by contacting us. These documents may include:

- the Fund's annual financial report most recently lodged with ASIC, or
- the Fund's half year financial report lodged with ASIC (after the lodgment of the annual financial report and before the date of the current PDS).

Where the Fund has continuous disclosure obligations, the Responsible Entity will meet those obligations by publishing material information online at www.ampcapital.com.au.

Your privacy

The main purpose in collecting personal information is so that we can set up and administer your investment account. If you do not provide the required information, we may not be able to process your application. If you would like us to not use your personal information for direct marketing purposes, please contact us.

The AMP Privacy Policy, which can be obtained online at www.ampcapital.com.au/common/privacy or by contacting us, sets out the AMP Group's policies on management of personal information. This information may be disclosed to other members of the AMP Group, financial advisers where applicable, to external service suppliers (including offshore suppliers) who supply administrative, financial or other services that assist us in providing services to you, and to anyone you have authorised or if required by law.

Under the Privacy Act, you may access personal information held about you, although the Privacy Act does set out some exemptions to this. If you believe information held about you is inaccurate, incomplete or out of date, please contact us.

Communication by fax

When you communicate with us by fax, it is your responsibility to obtain confirmation from us that we have received your fax. Neither we nor the Responsible Entity are responsible for any loss or processing delay that occurs as a result of us not receiving a faxed communication. Please note that we do not accept a sender's fax transmission record as evidence that a communication has been received by us. You also indemnify us and the Responsible Entity against any loss or liability arising from us or the Responsible Entity acting on any fraudulent communication received by fax.

Unit Pricing Discretions Policy

The Responsible Entity may exercise certain discretions in determining the unit price of units on application and withdrawal in the Fund. The Unit Pricing Discretions Policy, which can be obtained online at www.ampcapital.com.au or a copy can be obtained, free of charge, by contacting us, sets out the types of discretions that the Responsible Entity may exercise and in what circumstances the Responsible Entity exercises the discretions and the reasons why it considers the policies are reasonable. The Responsible Entity is required to keep a record of any instance where a discretion is exercised in a way that departs from these policies.

Asset Valuation Policy

Assets in which the Fund invests are held directly by the Fund or through underlying funds in which the Fund invests. Generally, these assets are valued at least each business day using market prices in accordance with the AMP Capital Asset Valuation Policy.

Currently, a small percentage of the Fund is invested in illiquid assets. Illiquid assets held by the Fund are valued either based on fair value, where the current tradeable price is not readily available, or, where the assets are accessed through an underlying fund, based on the most recent unit price of that underlying fund.

Where the assets are valued based on fair value, the valuer selects the valuation methodology that is the most appropriate for a particular investment and one that represents a fair and equitable outcome for all investors. The determination of fair value is intended to provide, on a best efforts basis, the amount for which an asset could be exchanged between knowledgeable, willing parties in an arm's length transaction. This may include the average of actual midprice quotes from recognised price providers, or a valuation based on the sum of the parts on refinance.

Where the assets are accessed through an underlying fund and valued using the most recent unit price of that underlying fund to determine the market value of the investment, the valuation of the underlying assets is based on the valuation methodology of that fund. Some of these underlying funds currently value their assets at par or acquisition value plus any accrued interest up to the valuation date.

For further information on AMP Capital's Asset Valuation Policy, please go to www.ampcapital.com.au or a copy can be obtained, free of charge, by contacting us.

Environmental, social and governance (ESG) considerations

AMP Capital acknowledges there are links between a company's environmental and social impacts, the quality of its corporate governance, and its long-term financial success. AMP Capital has an ESG and Responsible Investment (RI) Philosophy describing our approach to considering these issues in our investment decision making which is available at

www.ampcapital.com.au/about-us/esg-and-responsible-investment.

Decisions about whether to buy, hold or sell investments will still be based primarily on financial and economic factors. ESG issues may be taken into account by us in making these decisions as part of our investment research and analysis where we believe these factors may have a financially material impact on the value and performance (risk and/or return) of the investment. AMP Capital also engages with the board and management teams of companies in which we invest on relevant ESG topics as part of our investment research and proxy voting process.

However, in addition to consideration of financial and economic factors as noted above, AMP Capital may, in exceptional circumstances, exclude or divest (negatively screen), companies, asset types or industry sectors from the Fund where they have been determined as contravening the following ethical principles as defined in AMP Capital's ESG and RI Philosophy. In making such a decision, AMP Capital will take into account the extent (if any) to which a company's activities (conduct), products or services:

- violate the principle of respect for persons which affirms the intrinsic dignity of all people irrespective of age, gender, race, religion and prohibits the treatment of any human being merely as a means to an end, and/or
- can be used without causing harm to others including those who may choose to make use of the relevant goods or services.

In undertaking its assessment AMP Capital will consider (without limitation):

- whether activities (conduct), products or services contravene principles accepted under international human rights laws including but not limited to UN conventions
- the principle of 'double effect' – which may allow conduct that is not intrinsically wrong and is undertaken for an ethically justified 'principal effect' even if it has an unintended harmful 'secondary' (double) effect. Where a form of conduct may have a harmful 'double effect', AMP Capital will assess the extent to which the company is actively engaged in minimising and mitigating the unintended harm
- the extent to which the relevant activity, product or service is material to the conduct of the company in which the investment is to be made, and
- any reasonable argument or rebuttal submitted in good faith, as to why an adverse assessment may be based on an error of fact or assumption.

Where certain investments or sectors are determined by AMP Capital as contravening these ethical criteria, they will be excluded from the universe of permissible investments for the Fund. Where an existing investment is identified as contravening the ethical criteria, it will be sold down by us generally within a period of up to twelve months. This decision to exclude or divest investments is known as negative screening.

In summary, at present the application of the ethical principles outlined above will result in the negative screening of companies that AMP Capital believes have:

- known involvement in the production and manufacture of, or essential or significant involvement in the distribution and sale of, tobacco, or
- material involvement in the manufacture, maintenance or delivery of cluster munitions, anti-personnel mines, chemical or biological weapons.

We may update or vary these exclusions from time to time, following review and approval by AMP Capital's Investment Committee. Further information and detail on the application and scope of AMP Capital's ESG and RI Philosophy and a current list of sectors and individual companies subject to exclusion are available at

www.ampcapital.com.au/about-us/esg-and-responsible-investment.

These exclusions do not apply where AMP Capital invests in a pooled vehicle or fund managed by another investment manager and AMP Capital is unable to influence exclusive control over the investable universe of such a vehicle or fund, and such an investment will be subject to whatever ESG policy is adopted by the investment manager of that vehicle or fund. The negative screening will also not apply to cash, sovereign bonds, derivatives and exchange traded funds.

AMP Capital's Investment Committee is responsible for ensuring that any decision to negatively screen a company, asset type or industry sector from the investable universe of the Fund takes into account fund investment objectives and strategy and recommendations from AMP Capital's research and investment teams. Adherence to and monitoring of any excluded investments is overseen by AMP Capital's Investment Committee in consultation with AMP Capital's ESG and compliance monitoring functions and is generally reviewed annually.

More generally, except to the extent disclosed above in relation to consideration of ESG issues where it is believed these factors may have a financially material impact on the value and performance of the investment, and negative screening in exceptional circumstances on an ethical basis, AMP Capital has no predetermined view about what we regard to be a labour standard, environmental, social or governance consideration or how far they will be taken into account in the selection, retention or realisation of investments relating to the Fund.

CONTACTING AMP CAPITAL

Further information

If you have questions about investing in the Fund or require further information, please contact our Client Services team on 1800 759 543 between 8.30am and 5.30pm Sydney time, Monday to Friday.

Further information about the Fund is also available online at www.ampcapital.com.au/mfund. This information may include performance reports.

When reading Fund performance information, please note that past performance is not a reliable indicator of future performance and should not be relied on when making a decision about investing in the Fund.

Updating your details

To update your contact details or other information, please contact your broker.

Communicating with you

Investment information

We will send you the following investment information:

- confirmation of each transaction (other than transactions made through a regular investment plan)
- quarterly statements which show the balance of your investment and any transactions made and fees charged since your last statement, and
- a tax statement at the end of each tax year.

Fund information

We will provide you with the following information free of charge, on request:

- the Fund's annual financial reports
- a paper copy of any updated information, and
- any replacement PDS or updated incorporated information.
