## 2. HOW THE AMP CAPITAL GLOBAL PROPERTY SECURITIES FUND WORKS

The Fund provides investors with access to investment in listed real estate, primarily Real Estate Investment Trusts (REITs), listed on share markets around the world. Securities in which the Fund invests are diversified across a range of asset classes, property sectors and geographic regions, focusing on investments in Europe, the Americas and Asia Pacific.

Unlike direct property investments, listed real estate is generally highly liquid.

In assessing securities for inclusion in the Fund's portfolio, we implement a research driven process which integrates a stock specific (bottom-up) selection process complemented by a macroeconomic (top-down) approach to regional and country allocation. Active portfolio management enables the Fund to take advantage of global and regional listed real estate investment opportunities.

Screening for liquidity is incorporated at every stage of the investment process.

### Investing in a managed investment scheme

The Fund is a managed investment scheme structured as a unit trust and registered under the *Corporations Act 2001* (Cth) (Corporations Act). A managed investment scheme is where investors' money is pooled together to purchase the Fund's assets, and it is the investment manager, not investors, who has day to day control of the Fund. The Fund's constitution, along with the Fund's PDS, the Corporations Act and other relevant laws, sets out the relationship between the Responsible Entity and investors.

### The value of your investment

Investors in a Fund are issued with 'units', each of which represents a share of the value of the Fund's assets. The Fund may have a number of classes of units. Investments made through this PDS relate to Off-platform Class H units.

Unit prices can rise and fall on a daily basis depending on a number of factors, including the market value of the Fund's assets. Consequently, the value of your investment will vary from time to time.

The value of your investment at any point in time is calculated by multiplying the number of units you hold, by the Off-platform Class H unit price current at that time. Unit prices are updated regularly online at [www.ampcapital.com.au](http://www.ampcapital.com.au) and can also be obtained by contacting us.

## 4. RISKS OF MANAGED INVESTMENT SCHEMES

### All investments carry risk

Assets with the highest long term returns may also carry the highest level of short term risk, particularly if you do not hold your investment for the minimum suggested investment timeframe. Additionally, different investment strategies may carry different levels of risk, depending on the assets in which a fund invests.

When you invest in a Fund, you should be aware that:

- returns are not guaranteed – future returns may differ from past returns, and the level of returns may vary, and
- the value of your investment may vary, and there may be the risk of loss of invested capital.

The value of your investment may also be affected by the Fund-specific risks noted below and by other risks or external factors such as the state of the Australian and world economies, consumer confidence and changes in laws and regulations including tax laws and government policies relating to managed investment schemes.

Other factors such as your age, the length of time you intend to hold your investment, other investments you may hold, and your personal risk tolerance will affect the levels of risk for you as an investor. As the risks noted in this section do not take factors such as these into account, you should consider obtaining appropriate financial advice before making a decision about investing or reinvesting in the Fund.

### Risks specific to the Fund

Risks specific to the Fund may include or be associated with:

- **international investments** – including losses related to currency exchange rates, hedging, and changes in the state of the Australian and world economies.
- **property investments** – factors such as the quality of underlying properties and geographic location may affect the Fund's performance.
- **share market investments** – the value of the Fund's investment in listed securities may decrease as a result of adverse share market movements.
- **companies** – factors such as management changes may affect a company's performance.
- **derivatives** – the use of derivatives may magnify any losses incurred.
- **interest rates** – including the risk of capital loss in a rising interest rate environment.
- **investment management** – there is a risk that the investment manager will not perform to expectation or factors such as changes to the investment team or a change of investment manager may affect the Fund's performance.
- **liquidity** – assets subject to liquidity risk may be difficult to trade and it may take longer for their full value to be realised, and in circumstances where the Fund's portfolio ceases to be 'liquid' for Corporations Act purposes, there may be significant delays or a freeze on withdrawal requests.
- **sector** – returns may be adversely affected where the Fund's investments have a high exposure to a particular sector or sectors.
- **securities lending** – although engaging in securities lending may benefit the Fund by providing increased returns, there is a risk of capital loss.

---

// You should read the important information about risks before making a decision. Go to [www.ampcapital.com.au/pds/wgps/h](http://www.ampcapital.com.au/pds/wgps/h) – select 'Incorporated information' from the PDS information menu, and go to 'Risks of investing'. The material relating to risks may change between the time when you read this PDS and the day when you acquire the product.

The Fund may be suitable for investors seeking a portfolio of listed real estate on share markets around the world.

### Asset allocation

The Fund may invest up to 100% in listed real estate, primarily REITs, listed on share markets around the world. The Fund may also invest up to 10% in cash.

**Performance benchmark** FTSE EPRA/NAREIT Developed Index Hedged in AUD Net TRI

### Suggested minimum investment timeframe

5 years

## Summary of risk level

### Risk band

1	2	3	4	5	6	7
---	---	---	---	---	---	---

### Risk label

Very low	Low	Low to medium	Medium	Medium to high	High	Very high
----------	-----	---------------	--------	----------------	------	-----------

The Fund's risk band and risk label are based on an estimation that the number of negative annual returns over any 20 year period would be within the range of 4 to less than 6. Information about the methodology used for calculating the risk level can be obtained by contacting us. This summary is not a complete description of the risks of investing in the Fund.

Consequently, before choosing to invest or reinvest in the Fund, you should read the Fund's PDS and incorporated information, and consider factors such as the likely investment return, the risks of investing and your investment timeframe.

We may change the Fund's investment return objective or investment approach, from time to time, if we consider it to be in the best interests of investors. If we do so, we will advise investors.

In section 5 only, the term 'we' refers to the Responsible Entity.

## 6. FEES AND COSTS

### DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns. For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask the fund or your financial adviser.

### TO FIND OUT MORE

If you would like to find out more, or see the impact of fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) website ([www.moneysmart.gov.au](http://www.moneysmart.gov.au)) has a managed funds fee calculator to help you check out different fee options.

## Summary of fees

### Overview of fees and costs

Table 1 provides an overview of the costs of acquiring units in the Fund, and the fees and costs charged in relation to your investment. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole. For the Fund, these fees and costs are paid out of the Fund's assets, and are reflected in the unit price. You can use this information to compare the Fund's fees and costs with those of other funds.

Unless otherwise stated, the fees and costs shown in this section are inclusive of Goods and Services Tax (GST) and any applicable stamp duty, less Reduced Input Tax Credits (RITCs) or other input tax credits claimable.

Unless otherwise specified, all dollar amounts are Australian dollars.

**Table 1**

TYPE OF FEE OR COST	AMOUNT
<b>Fees when your money moves in or out of the managed investment product</b>	
Establishment fee	Nil
Contribution fee	Nil
Withdrawal fee	Nil
Exit fee	Nil
<b>Management costs<sup>1</sup></b>	
The fees and costs for managing your investment	1.29% pa of the Fund's net assets

- See Table 2 for an example of the calculation, and component parts, of the management costs.

### Important

Fees may be payable to your financial adviser, these fees are additional to the fees noted in Table 1 (refer to the Statement of Advice provided by your adviser).

## Changes to fees

The Responsible Entity may change the fees noted in this PDS at its discretion and without the consent of investors. For example, fees may be increased where increased charges are incurred due to changes to legislation, where increased costs are incurred, if there are significant changes to economic conditions, or if third parties impose or increase processing charges. However, we will give investors 30 days' written notice of any intention of the Responsible Entity to increase the existing fees or introduce performance fees or contribution or withdrawal fees.

## Example of annual fees and costs

Table 2 gives an example of how the fees and costs in the Fund can affect your investment over a one year period. You should use this table to compare this product with other managed investment products. The fees and costs shown in this table are an example only and are not additional to the fees and costs described in Table 1.

**Table 2**

EXAMPLE – AMP CAPITAL GLOBAL PROPERTY SECURITIES FUND BALANCE OF \$50,000 WITH A CONTRIBUTION OF \$5,000 DURING THE YEAR		
Contribution fees	Nil	For every additional \$5,000 you put in, you will be charged \$0.
<b>Plus</b> Management costs <sup>1</sup>	1.29% pa of the Fund's net assets	<b>And</b> , for every \$50,000 you have in the Fund you will be charged \$645 <sup>2</sup> each year.
<b>Equals</b> Cost of the Fund <sup>3</sup>		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged a fee of: <b>\$645<sup>2</sup></b> <b>What it costs you will depend on the fund you choose and the fees you negotiate.</b>

- Management costs are expressed as a percentage of the Fund's net assets. Management costs are made up of a management fee of 1.27% pa and estimated indirect costs of 0.02% pa. The sum of these figures may differ to the total management costs, due to rounding.
- This cost does not include the management costs charged on the additional \$5,000 investment. The additional management costs would be \$64.50 if you had invested the \$5,000 for a full 12 months.
- This cost does not include any advice fees paid to your financial adviser.

**// You should read the important information about fees and other costs before making a decision. Go to [www.ampcapital.com.au/pds/wgps/h](http://www.ampcapital.com.au/pds/wgps/h) – select 'Incorporated information' from the PDS information menu, and go to 'Fees and costs'. The material relating to fees and other costs may change between the time when you read this PDS and the day when you acquire the product.**

## 7. HOW MANAGED INVESTMENT SCHEMES ARE TAXED

Investing in a managed investment scheme is likely to have tax consequences for investors. Specifically, managed investment schemes do not pay tax on behalf of investors in the scheme, and investors are assessed for tax on the net income generated by their investment in the scheme.

You are strongly advised to seek professional taxation advice before you invest or deal with your investment, as the taxation treatment of your investment will be specific to your circumstances and to the nature of your investment.

---

// You should read the important information about taxation before making a decision. Go to [www.ampcapital.com.au/pds/wgps/h](http://www.ampcapital.com.au/pds/wgps/h) – select 'Incorporated information' from the PDS information menu, and go to 'Taxation'. The material relating to taxation may change between the time when you read this PDS and the day when you acquire the product.
